
March Virtual PDH Event

Development Projects at Pittsburgh International Airport

A joint meeting with Penn State Beaver and the Pittsburgh Chapter of PSPE

- When:** Thursday, March 25, 2021, 12:00 Noon
- Where:** Online webcast
- Register:** To register please contact Steve Wilson by COB Wednesday, March 24, at 304-387-2178 or sfwilson55@gmail.com.
- Link:** The link for the presentation will be provided once you register.
- Cost:** There is no charge for this event.

Program:

We are very excited that Tom Woodrow, P.E., BCEE, will be our guest speaker this month and will be providing an update on various development projects at Pittsburgh International Airport (PIT). As everyone is well aware, the pandemic has had a major impact on the aviation industry. Despite that, PIT has continued to move forward with key business initiatives including a new terminal, real estate development, increasing growth in air cargo, and providing reliable and resilient electrical service through a first-of-its-kind microgrid. This presentation will focus on providing an update on the Terminal Modernization Program, the development of Neighborhood 91, new cargo development and the microgrid.

Tom Woodrow is the Vice President of Engineering for the Allegheny County Airport Authority. Tom is responsible for managing the design engineering, contracts, and construction for all capital improvement and development projects at both Pittsburgh International Airport and Allegheny County Airport. Tom has over 31 years of professional experience in both the private and public sectors including aviation, automotive, iron and steel, midstream oil and gas development, and public water and sewer. Tom holds an MBA from Robert Morris University, as well as a B.S. in Environmental Engineering Technology and an Associate Degree in Electrical Engineering Technology from Penn State.

1 PDH will be available to participants.
